Andre wijaya

Software Engineer || Fullstack Developer || GenBI Member
Bandar Lampung, Lampung, Indonesia

Ringkasan

I am a graduate of the University of Bandar Lampung and a former member of the Internet of Things Laboratory and the Bank Indonesia organization (GenBI). As a software engineer, I enjoy bridging the gap between engineering and design — combining my technical knowledge with a keen eye for design to create beautiful, scalable, and efficient applications. My goal is to always build systems that perform seamlessly under the hood while providing engaging, pixel-perfect user experiences.

When I'm not in front of a computer screen, you'll likely find me playing guitar, reading, or crossing off another item on my bucket list.

Pengalaman

CV Nusantara Agro Tech
Full Stack Developer
September 2023 - Present (1 tahun 1 bulan)
East Java, Indonesia

Here, I took on the role of a full-stack developer, tasked with creating an admin dashboard for a technology known as Smart Shaker. Additionally, I was responsible for developing the backend API to support both web and mobile platforms.

Generasi Baru Indonesia (GenBI)
Member
Maret 2023 - Desember 2023 (10 bulan)
Bandar Lampung, Lampung, Indonesia

I actively participate as a member of Generasi Baru Indonesia (GenBI) at the University of Bandar Lampung. Engaging with GenBI has provided me with valuable experiences and opportunities to contribute to various initiatives and projects. Being part of this dynamic community has allowed me to collaborate with fellow members, attend events, and actively contribute to the organization's goals.

PT. Pindad (Persero)
Frontend Web Developer
Agustus 2022 - Desember 2022 (5 bulan)
Bandung, Jawa Barat, Indonesia

In my fifth semester, I landed my first internship at PT. Pindad, a defense company specializing in the construction of tanks, weapons, and heavy equipment. My primary responsibility was to develop a website known as ICSS (Integrated Communication Security System). This website serves the purpose of monitoring all areas within Pindad, featuring CCTV displays and providing alerts in case sensors in the Pindad area are activated.

Lab.IOT(Internet Of Things)Universitas Bandar Lampung
Software Developer
Juli 2021 - Juni 2022 (1 tahun)
Bandar Lampung, Lampung, Indonesia

During my first year at university, I devoted a significant amount of time to the laboratory specializing in the Internet of Things (IoT). There, I gained extensive knowledge in programming, sensors, and various aspects of IoT. Engaging in numerous projects assigned by my seniors further enhanced my practical skills and understanding of the field.
